Subject Index

Acoustic property, 189
Activated carbon, 149, 269
Adhesive strength, 71
Adsorption, 11, 39, 259, 269
Aggregational behavior, 111
Aggregation number, 79
Aluminophosphates, 251
Amino acid, 1
Anionic surfactant, 103
Antidepressants, 125
AOT, 1
Asymmetric membrane, 227
Atomic defects, 219

Barton equation, 39

Carbon, 39
Catalyst, 219
CdS, 137
Chain extension, 71
Co, 251
Composite membrane, 227
Copper, 207
Cr^{5+}, 183

D'Arcy and Watt equation, 39
Diagnostic imaging, 93
DS equation, 39

Electroacoustics, 11
Electrocorundum, 199
Electroless plating, 227
Electron spin resonance (ESR), 175
Enthalpy of adsorption, 39
ETAS-10, 131
Extraction, 1

Fluorescence spectra of pyrene, 103
Fluorinated surfactant, 103
Free energy of adsorption, 125

Gas sensor, 169
Goethite, 11
Grain size, 199

High pH, 57
Hydrogen, 207
Hydrophobic microchannel, 29

Infrared (IR), 175
Inorganic membrane, 227
In situ modification of boehmite sol particle, 161
Intercalation, 137
Internal friction, 207
Iron, 175
Isomorphous substitution, 131

Lanthanum, 175
Layered compound, 137
Layer rigidity studies, 193
Liquid metal infiltration, 189

Magnetite particles, 93
MCM-41, 259
MCM-41 mesoporous materials, 175
Mechanical property, 207
Membrane inclusions, 57
Mesoporous, 161
Mesoporous material, 251
Mesostructured materials, 213
2-methylisoborneol, 269
Micellization, 125
Microchannel emulsification, 29
Micropore, 241
Microporosity, 39, 193
Microporous materials, 131
Modeling, 11
Modifications, 143
Molecular sieve, 241
Monodispersed water-in-oil emulsion, 29
Mössbauer spectra, 175

PII: S0927-7757(00)00809-8

Nanoclusters, 183
Nanocomposite, 137
Nanomaterials, 219
Nanoparticles, 65
Nickel, 227
NMR spectroscopy, 251

Oil-palm stone, 149
Ordered, 235
Organophilicity, 259
Orientation, 57
Oxides, 143

Particle radii, 79
PEG coating, 93
Percolation channels, 193
Photoluminescece, 183
Photoreduction of nitrate, 137
PLA:PEG particle systems, 79
Polydisperse polyglycol, 111
Polyurethane dispersions, 71
Pore size, 199
Porous aluminum, 189
Porous ceramics, 199
Porous metals, 207
Porous polysilicon, 169
Porous silica film, 235
Porous SiO_2, 183
Proton, 11

Red blood cell, 57
Replication, 235
Residual NCO group, 71
Reverse micelle, 1
Reverse microemulsion, 65
Rietveld technique, 219

Self-assembly, 213
Self-consistent field theory, 79
Sensitivity, 169
Si, 251
Silica, 65
Silica xerogel, 241
Silicon carbide, 199
Silicon microchannel plate, 29
Sol-gel, 161
Solidification, 207
Spinel, 161
Sugar ball, 103
Sulphur dioxide adsorption, 149
Surface activity, 125
Surface area and porosity, 149
Surface characterisation, 241
Surface chemistry, 149
Surface modification, 269
Surface oxygen, 269
Surface tension, 103
Synthesis, 131

Temperature, 111
Template, 235
Tether, 57
Thermogravimetric analysis (TGA), 175
Titania coating, 65
Titano-alumino-silicate, 131
TPD, 259
Trimethoxysilane-PEG, 93
Tungsten oxide, 213

Ultrafiltration membrane, 161

VOCs, 259
Volume fraction profile, 79

Water, 39
Weight average molecular weights, 71

X-ray diffraction, 219
X-ray diffraction (XRD), 175

Zeolite molecular sieves, 175
Zeolites, 131, 143
